Others	Do not look down upon this vintage graphics card. GT 1030 (2GB) is an excellent entry-level graphics card, adopting the award-winning NVIDIA Pascal architecture. Its comprehensive performance is slightly lower than that of GTX 750, but its power consumption control is obviously better.
Specialty	GT 1030s thermal design power is only 30W, and its energy efficiency ratio is very high. Its powerful graphics engine and most advanced technologies give you a performance upgrade to easily drive today's most demanding PC applications.
